## (54) ENDOSCOPE APPARATUS

## (57)Abstract:

**PROBLEM TO BE SOLVED:** To implement individual countermeasures efficiently by combining an antistatic measure and an EMC countermeasure.

**SOLUTION:** In a case body 30 of a light source unit or the like in an endoscope apparatus, connectors 31a and 31b to be connected to other peripheral devices are arranged exposed outside. The connectors 31a and 31b are connected to connection connectors 33a and 33b on a circuit board 32 composing an electronic circuit 37 within the apparatus through harnesses 34a and 34b. Antistatic measure parts 35a and 35b and EMC countermeasure parts 36a and 36b are connected sequentially to an input/output part of the circuit board 32 connected to the connectors 31a and 31b in proximity to the connection connectors 33a and 33b as output/input terminal.
